

AcoustixFusion II

2.1 Speaker system with USB and SD audio playback

essentials

If you are not only looking for the sound you expect, but also the one you can only dream about, you will love the Klip Xtreme® KES-390, a 2.1 speaker system that combines a bold design, cutting edge technology with USB and SD audio playback. Consisting of two satellite speakers and a powerful subwoofer, it is able to pump 48 watts of total RMS straight to your ears. What's more, you can exercise complete control over your listening experience by adjusting the volume and bass knobs in the main unit or through the wired remote, which also includes both headphone and microphone jacks for added functionality.

Features:

- Seamless integration of multiple audio devices
- Energy efficient for lower power consumption
- Remote volume control, featuring three auxiliary jacks, allows you to connect a DVD player, CD player, mobile phone or video game console while plugged into your computer
- Front firing subwoofer disperses audio to create a warm and enveloping listening effect
- Desktop or wall mount satellite speakers
